PROFILE

Dynamic and results-oriented web developer with hands-on expertise in React, Vue and OutSystems for mobile and web applications. Possessing a proven track record of delivering high-quality solutions, I am committed to continuous learning and innovation.

SKILLS

- Next JS
- React Native
- React JS
- OutSystems
- Vue JS

- Laravel
- JavaSript
- TypeSript
- PHP
- Git

- Node.js
- NestJS
- Express.js
- MySQL
- PostgreSQL

WORK EXPERIENCE

FRONTEND DEVELOPER

PT. Sarana Multigriya Finansial (Persero)

Aug 2024 - Present

- Develop and maintain internal application interfaces using Vue.js and JavaScript, focusing on performance and user experience.
- Collaborate with backend teams to integrate APIs and ensure smooth data synchronization.
- Implement code quality standards and component reusability to improve frontend development efficiency.
- Contribute to new feature development and UI enhancement based on business requirements.

CELL LEAD FRONTEND DEVELOPER

Berijalan Techno Center Astra Credit Companies

March 2024 - August 2024

- Led the frontend team in building and maintaining applications using Next.js and OutSystems.
- Responsible for frontend architecture, code reviews, and ensuring consistent design and high-performance delivery.
- Coordinated with product owners and backend teams to ensure effective cross-functional workflows.
- Improved development efficiency by implementing best practices, technical documentation, and streamlined collaboration processes.

REACT DEVELOPER

Berijalan Techno Center Astra Credit Companies

January 2023 - February 2024

- Developed web applications using React.js and React Native, focusing on high performance and great user experience.
- Implemented state management using Redux and handled efficient API integrations.
- Collaborated closely with design teams to ensure responsive and consistent interfaces across multiple devices.
- Performed component optimization and code refactoring to improve project maintainability.

OUTSYSTEMS DEVELOPER

Berijalan Techno Center Astra Credit Companies

July 2021 – August 2023

- Built internal business applications using the OutSystems Platform to support operational needs.
- Designed business logic, workflows, and integrations with external systems using a low-code development approach.
- Optimized application performance and ensured development followed SDLC standards.
- Supported deployment processes and performed troubleshooting to enhance system stability.

PHP HYBRID

XSIS BOOTCAMP

May 2021 – July 2021

- Completed an intensive 3-month training program focused on PHP web development, Object-Oriented Programming (OOP), and the Laravel framework.
- Built a final project — a CRUD web application implementing the MVC architecture, MySQL database integration, and Laravel Blade with Eloquent ORM for efficient development.

MOBILE APPS DEVELOPER

FREELANCE

2018 - 2019

Translating design concepts from Figma into logical and visually appealing mobile applications using Android Studio.

ASSISTANT LECTURER

BASIC PROGRAMMING

2018 - 2019

Assisted lecturers in conducting practicum sessions and providing support to students in basic programming courses.

EDUCATION

Ahmad Dahlan University YOGYAKARTA

2016 - 2021

BACHELOR'S DEGREE MAJOR IN INFORMATICS ENGINEERING

GPA: 3.27 / 4.00

PORTFOLIO HIGHLIGHTS

- **Dashboard SMF – Web App (Vue.js)**

  Frontend Developer — PT Sarana Multigriya Finansial

  - Re-engineered the entire SMF dashboard, migrating it from Tableau to a fully custom Vue.js application.
  - Worked in a 2-person team (FE + BE), designing and developing the system end-to-end.
  - Delivered a modern, scalable dashboard that eliminated the need for Tableau servers, reducing licensing costs while improving performance and flexibility.

- **Loan Origination System (LOS) – Web App (Next.js)**

  Frontend Developer — PT Sarana Multigriya Finansial

  - Developed core frontend modules using Next.js with clean, scalable components.
  - Translated complex spreadsheet-based loan logic into accurate and intuitive UI flows.
  - Resolved manual validation errors, accelerating QA and user verification.
  - Improved efficiency in loan application and evaluation processes.

- **Moxa Mitra – Mobile App (React Native)**

  Cell Lead Frontend Developer — Astra Credit Companies

  - Led 3 Frontend Engineers, ensuring timely delivery and high code quality.
  - Built key mobile features and optimized performance for smoother user experience.
  - Collaborated during grooming and deployment, ensuring stable releases.
  - Improved partner onboarding and service management efficiency.

- **Acc One Migration – Web App (Next.js)**

  Frontend Developer — Astra Credit Companies

  - Part of the team migrating the Acc One platform from OutSystems to Next.js.
  - Reconstructed business logic and interfaces from undocumented legacy workflows.
  - Contributed to a faster, more scalable, and maintainable application.
  - Supported the successful migration of the entire system to modern web technology.
